## Malware: Addressing the Problem from a Hands-On, Practical Point of View

*Presented by*

*Delaware InfraGard Members Alliance*

*Friday, May 6<sup>th</sup>*

*Wilmington University: 320 North DuPont Highway, New Castle, DE*

*Register now: <http://register.deinfragard.com>*

\* \* \* \* \*

*This meeting is open to all, including non-members. We offer refreshments, cross-industry peer networking, insight on today's challenges with IT fraud and malware, and a great environment to connect with your community.*

\* \* \* \* \*

*The sophistication and recurrence of malware on corporate and government networks is increasing at an alarming rate. Even with firewalls, host based security systems, and anti-virus solutions in place, malware is still creeping onto the LANs. Identifying and removing malware is as much art as it is science. Reverse engineering of these pests is often easier for those people who are developers, programmers, or coders. But what about technical personnel who don't write code? What are they to do? This presentation will walk through attack vectors, malware analysis, and removal in approaches for non-developers. This presentation is based on over five months of data gathering from first hand experiences and it uses over a dozen, real-life examples to show how to identify and combat malware.*

**AGENDA**

*Arrive early to collaborate with your peers*

- 8:15a Registration and Refreshments*
- 8:30a Welcome and Chapter Business*
- 8:40a Jo Gordon, Infragard Coordinator, FBI*
- 9:00a Refreshments and Networking Break***
- 9:15a Todd Karpel, Intelligence Officer, I&A-Department of Homeland Security*
- 10:15a Michael Robinson, Senior Computer Forensic Analyst, Harris Corporation*
- 12:00p Close***

*The Delaware Infragard represents a partnership between public and private sectors, whose purpose is to enhance the security of Delaware and surrounding areas through information sharing and training. Our chapter is dedicated to promoting information security and critical infrastructure protection throughout the Delaware region.*

## **DIRECTIONS**

***Wilmington University: 320 North DuPont Highway, New Castle, DE***

The meeting is on the third floor of the Doberstein Admissions Center (DAC) building, Rm. 309. As you turn in the entrance road at the light, it's the brick building on your left. The entrance to the building, elevators, stairs, are on the side that faces away from Rt. 13.

### **Directions from Wilmington:**

Take Rt. 13 South to New Castle. The University is across the street and just before Wilmington Airport and the Rt. 141 overpass. Look for a foot bridge and turn left at the traffic light with the Hess station on the near left corner.

### **Directions from I-95:**

Take Rt. 141 south to Rt. 13 north (interesting how two north/south roads can intersect, no?). Go over the overpass for Rt. 13 and take the cloverleaf exit on the right. Stay in the right lane and turn the light (Hess station on far right corner).

### **Directions from Southern Delaware:**

Take Rt. 1 North to Wilmington. Continue onto Rt. 13 North. Pass the Rt. 273 intersection and Wilmington Airport. Just past the Rt 141 overpass, turn right at the light with the Hess station on the far right corner.
